

QOVES

Facial Analysis Platform / Voice, Messaging & Usage

Research-backed · Human-reviewed · Personalised

THE BRAND IN ONE LINE

QOVES is a facial analysis platform that applies peer-reviewed academic research to give people a science-backed understanding of their own features. Every report is reviewed by a specialist team in facial aesthetics and attractiveness research before it is delivered. It is not a beauty quiz and it is not a generic AI.

Frame QOVES as the foundation that makes better aesthetic decisions possible. QOVES does not change how someone looks. It gives them the understanding to make informed decisions about their own face.

WHAT WE ARE

- A personalised facial analysis report, reviewed by a human specialist.
- Grounded in peer-reviewed academic research on facial aesthetics and attractiveness.
- A tool for understanding, not a tool for changing how someone looks.
- Non-surgical. Ethnicity, age, and lifestyle are all factored in.

WHAT WE ARE NOT

- Not a beauty quiz, a "rate my face" gimmick, or a ranking tool.
- Not an AI filter, a robot, or a fully automated system.
- Not instant or algorithmic. An analyst reviews every report.
- Not a diagnosis, a treatment, or a substitute for a professional consult.

CORE PRODUCT FACTS

The proof points that define QOVES. Weave them in naturally; never present them as a checklist.

- | | |
|---|--|
| ▪ A human analyst reviews every report. | ▪ Non-surgical. |
| Personalised to your face. | ▪ Ethnicity, age, and lifestyle all factored in. |
| ▪ Results in as fast as 48 hours. | ▪ Peer-reviewed academic research at its foundation. |
| ▪ 500+ facial landmarks mapped. | |
| ▪ Full analysis and action plan included. | |

VOICE & TONE

The voice is credible first, enthusiastic second. QOVES is a research-backed product.

The balance to hit: exciting enough that someone wants to find out what their own report says, grounded enough that they believe it.

NOT THIS

"Oh my god you guys QOVES literally changed my life, I cannot believe what it found."

THIS

"So my report flagged something I hadn't thought about, and it reframed a few things for me."

NAMING & REFERENCES

- Always written as QOVES, in all capitals. Never "Qoves," "qoves," or abbreviated.
- Refer to the product as a "facial analysis report" or "personalised facial analysis."
- Never describe it as an AI or a robot.
- Tag @QOVES in all posts, and use only the official link provided by your QOVES contact.

CLAIMS & ACCURACY

Only say things that can be stood behind from an actual report. Talk through specific findings: what the analysis showed and what was learned. Make no health claims. Never say QOVES diagnosed, treated, or fixed anything.

LANGUAGE TO AVOID

Prohibited outright:

Fix / Fixed · Correct / Corrected · Transformation · Looksmaxxing · Diagnose / Diagnosis · Glow-up · Dysmorphia

Also avoid:

Flaws · Insecurities · Problem areas · "What's wrong with my face" · Robot / AI · Prettier / More handsome · Level up your looks · Rated / Ranking · Dystopian · Black Pill · Competitor mentions · Discount framing

Avoid anything that reads as a generic paid post or a performed reaction, and any framing that makes QOVES sound like a quick fix, instant, or algorithmic.
